Waste management and marine litter in Finnmark

Inter-municipal waste management companies

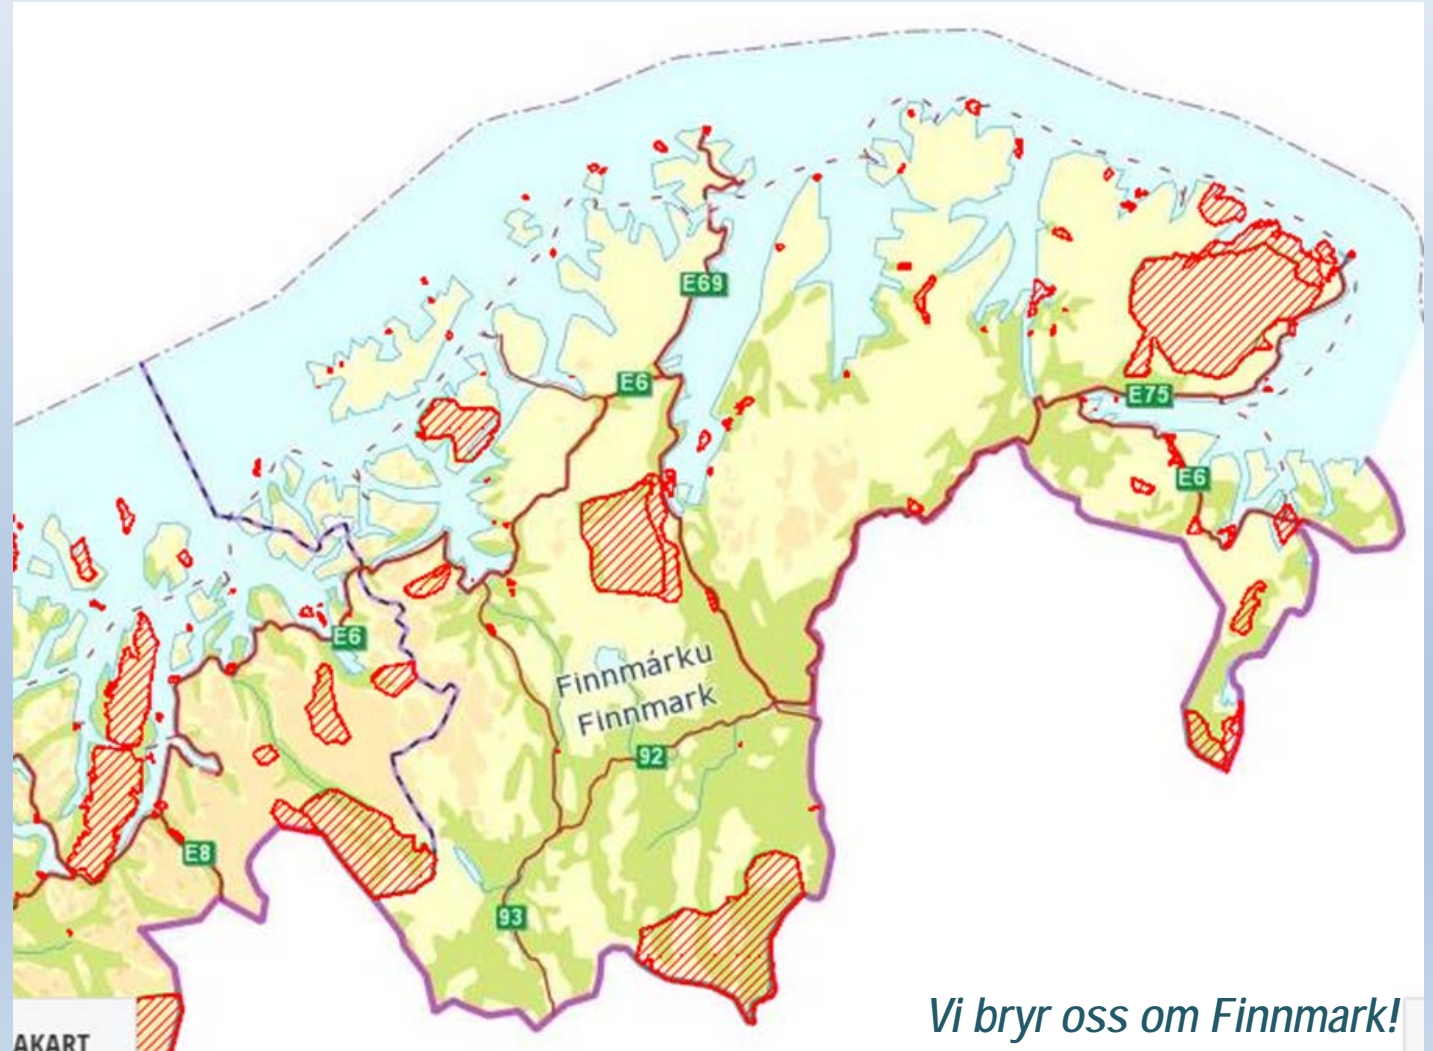

- 5 companies – 19 municipalities
- Sorting of household waste – different sorting between the companies
- Before collecting, inhabitants in Alta sort out 5 different elements, Vadsø sort out only 1 element, paper.
- Only 2 active landfills
- No incineration plant

Marine litter

- since 2015 – more systematic effort on cleaning up shorelines (protected areas), but still a long way to go.
- clean-ups are carried out each year, between 15-20 beaches.
- annual shoreline clean-up by the County Governor
- schools, associations and clubs etc. contribute more and more to shoreline litter picking

Border crossing – marine litter-project

- Norwegian – Russian – Finnish project 2016 & 2017
- 60 NO-RU-FI pupils took part in the project in 2016
- 4 km of shoreline cleaned > 10 m³ marine litter, mostly plastics, 2016
- OSPAR registration
- 2017 – Kola Fiord

Marine litter - The Challenges has not changed

- remote areas
- large stretches of coastline situated far from roads and settlements – expensive logistics.
- Finnmark County have almost the same number of inhabitants as Tromsø municipality - distributed over an area 7 % larger than Denmark – few available hands

Port Waste Management Planning for Ship Generated Waste

- Approving plans
- We still struggle to get hold of updated and upgraded plans
- A number of ports is yet to be confirmed if they are runned by the municipal port authorities or not

Thank you for your attention
