Future of Wood

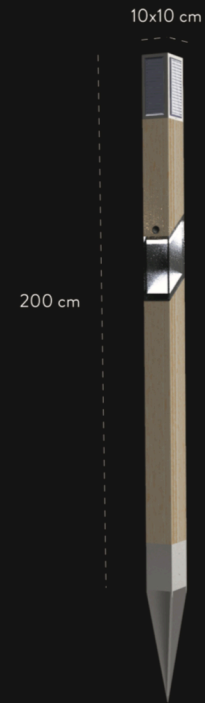

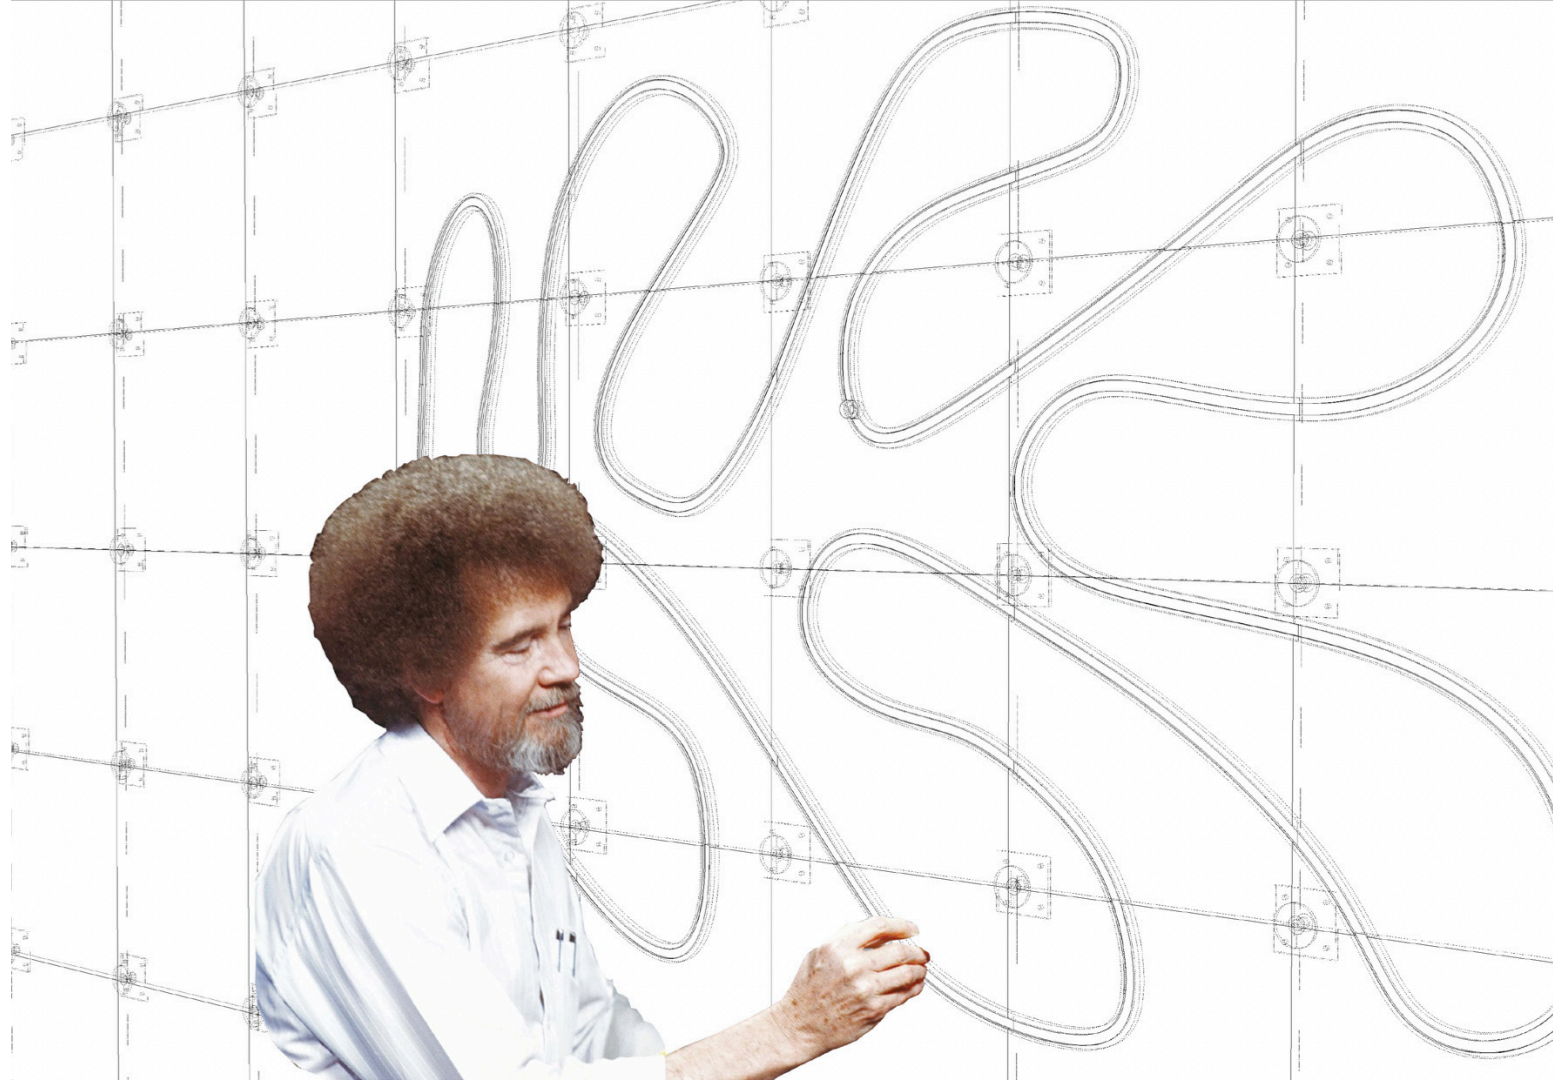

# Ladin

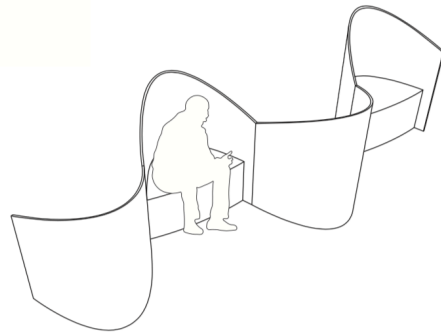

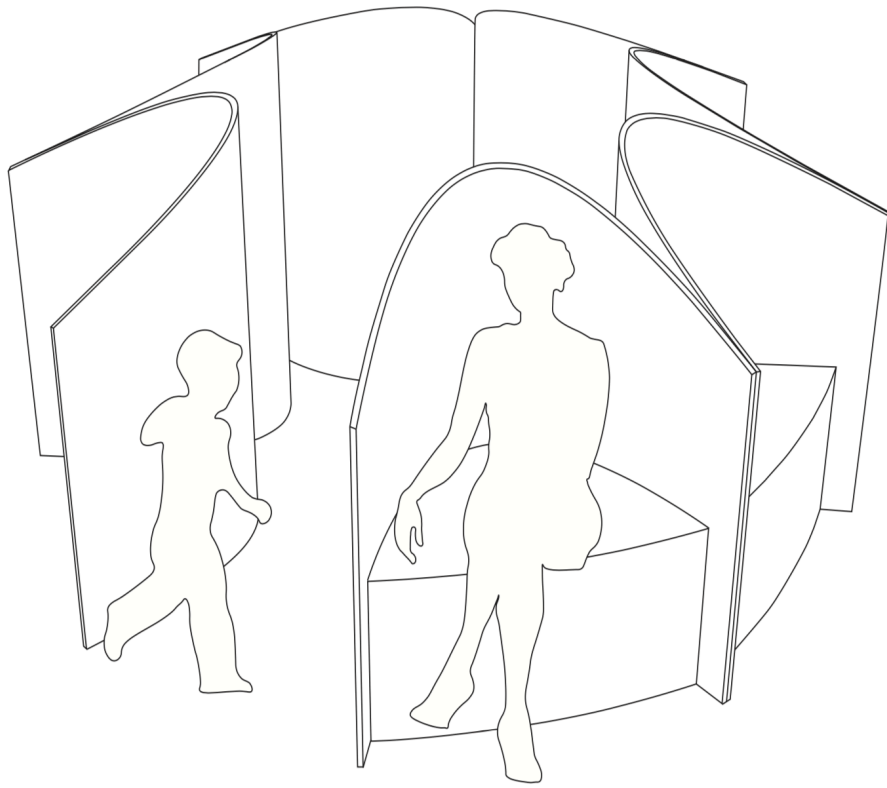

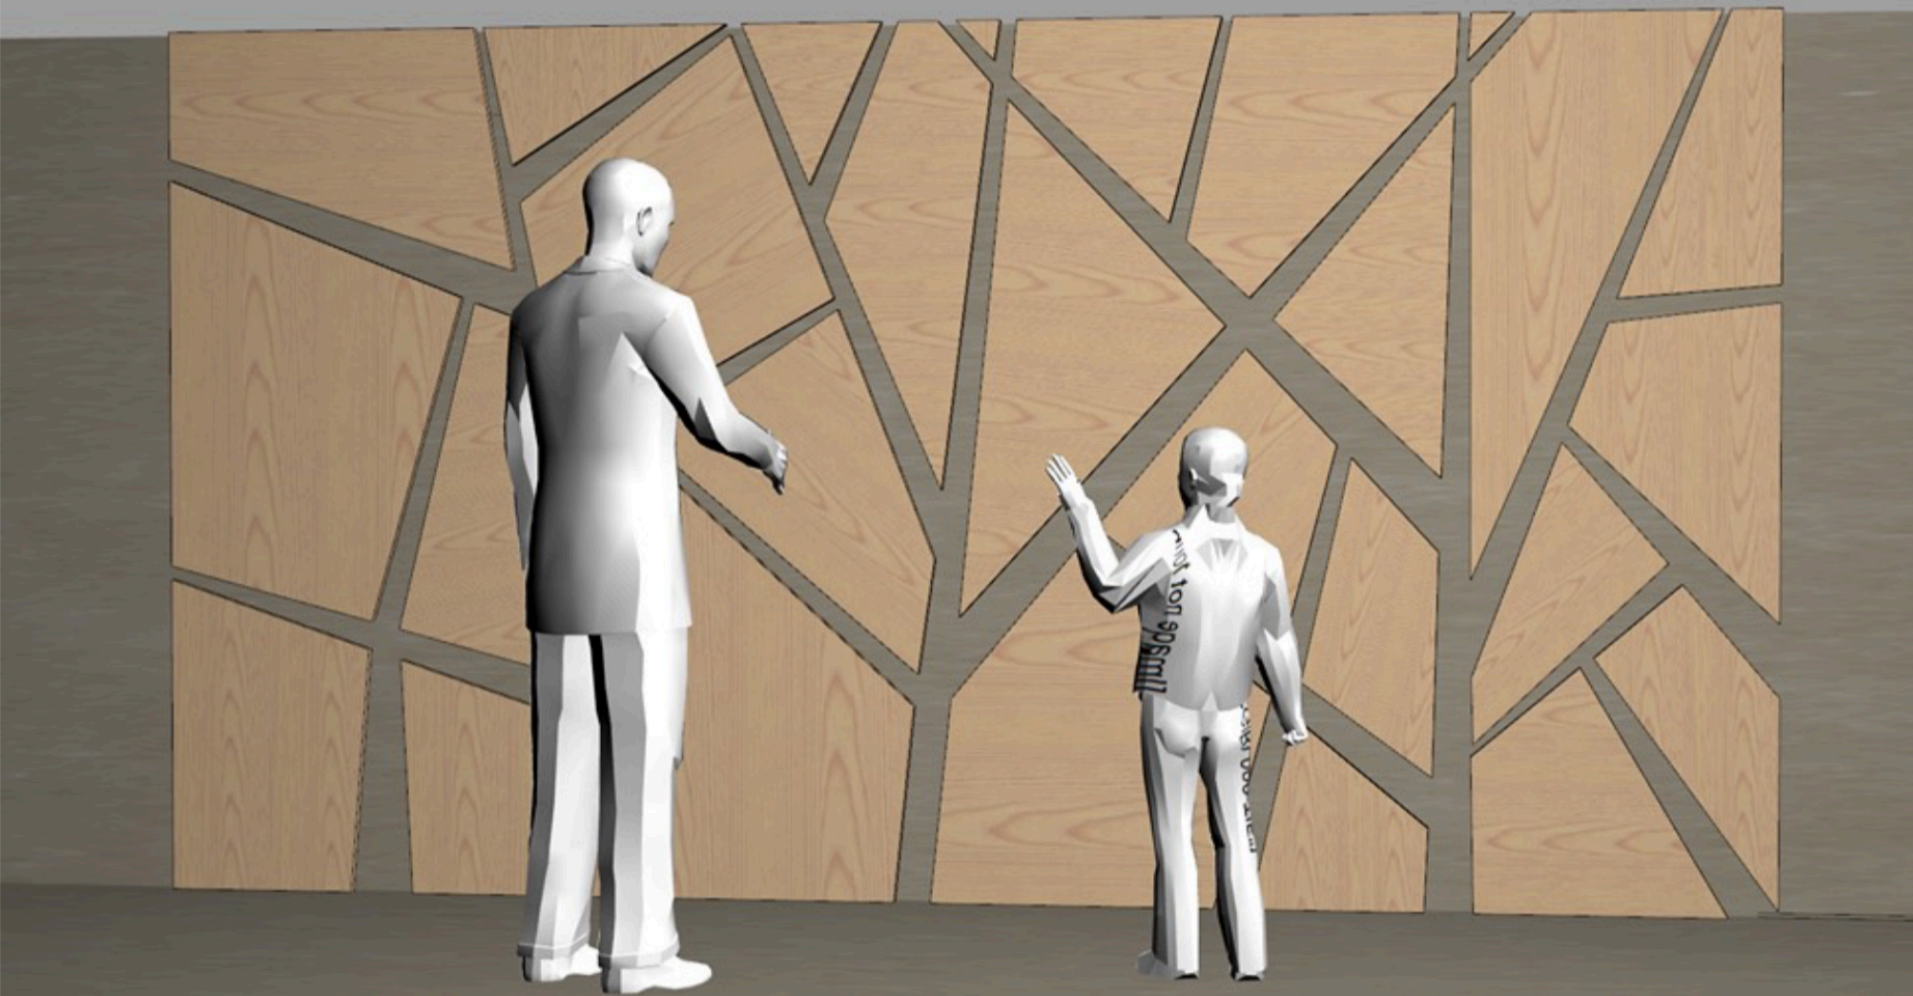

# USER INTERFACE & GAMES

## Sequence:

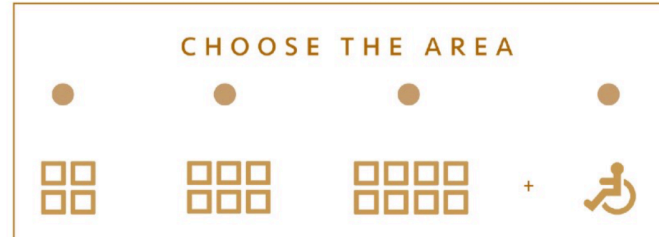

Repeat the ever-increasing sequence of flashing lights. If you push the wrong tile, the game is over.

## Reaction:

Press the flashing tiles as quickly as possible. One tile will flash with light at a time. In total 20 tiles will flash.

## Memory:

A number of tiles light up. Try to memorise them. Lights go out and you have to press the ones that were lit up.

Det er massevis av tverrfaglig  
innovasjonspotentiale for bruk av tre  
i sykehus, helse og folkehelse.
